

Name Kyrylo Fedorov

Email kyrylo.fedorov@gmail.com

Birth August 10, 1977

Residence Kyiv

Proficiency

- javascript
- nodejs / php
- databases
- build & testing
- layout & style

I consider myself as a full stack javascript developer. Mainly I'm experienced in web-oriented, large-scale applications. Last 2+ years biggest part of my projects were high load applications. I prefer to plan both backend and frontend parts architectures before diving deep into the coding, but the rule of thumb is using of node.js. Since I'm focused on a language, (javascript) it doesn't metter to me much which framework suppose to be used on a project, though I prefer vanilla JS, I have a plenty of experience with all latest JS frameworks. I'm a follower of TDD pattern and prefer to use mocha, chai and sinon for testing. While writing my code I use different automation tools, such as: webpack, gulp, grunt. I can work both, with a team and as a stand alone developer.

WORK EXPERIENCE

10.2014 - PRESENT. REAKTIVATE. Full Stack Web Developer

11.2013 - 09.2014. CONTRACTOR AT ECO&TECH. Responsible for business logic, back-end and front-end.
